

STEEL PROFILES

Steel Profiling and Cutting Services

We offer a diverse range of profiling services tailored to meet the needs of clients across various industries, including construction. Utilizing our state-of-the-art steel and machinery, we provide precision cutting solutions through laser, plasma, and oxyfuel techniques, among other advanced methods.

Our cutting services include:

- **Steel Profiled Plate:** Capable of producing steel plates up to 20mm thick with a precise tolerance of ± 0.4 mm.
- **HD Plasma and Oxyfuel Cutting:** Available for mild steels with a thickness range of 8mm to 80mm, offering a tolerance of ± 2 mm.

Examples of Steel Profiles We Provide:

- Round and Rectangular Bars
- Parallel Flange Channels (U-Shaped)
- Flat Sections
- Tapered Flange Beams (I-Shaped)
- Circular, Rectangular, and Square Hollow Sections
